Growers of Bismarck Plant Materials Center Grass and Forb Releases

March 2004

Compiled by Nancy K. Jensen Bismarck Plant Materials Center Agronomist

Following is a list of growers who are producing grass and native forb (wildflower) and legume seed of Bismarck Plant Materials Center (PMC) cooperative releases (cultivars and pre-varietal germplasm). It also includes growers producing rhizomes (vegetative material) of Red River germplasm prairie cordgrass.

Those included on the list are growers who have received seed from the PMC, grown it for increase, and are now marketing their seed. Other vendors and seed distributors sell, but do not generally grow Bismarck PMC releases. These wholesalers and retailers are not included on the list, as tracking of all of these entities is difficult. The PMC does not guarantee quality or availability of any seed that growers may produce and market. Purchasing certified seed is always advantageous to the buyer.

Cooperators and agencies interested in purchasing seed or rhizomes should make their own contacts regarding availability and price.

How to Use the Directory

Grasses are divided into two categories: WARM-SEASON GRASSES and COOL-SEASON GRASSES. The FORBS are listed in a separate category. Under each common name are the release names for that species. The designation "Germplasm" or "Ecotype" indicates it is not a cultivar or variety release. The numbers to the right of each release name correspond to grower information on following pages. The boxed numbers indicate the grower has or is producing certified seed of the release.
